

Cardiology

This Learning Pathway includes training and tools for cardiology teams to improve quality of life along the trajectory of heart disease. It includes continuing education courses in how to communicate with patients about their goals of care, support difficult decision-making, manage symptoms, and when to refer to specialty palliative care.

Billing and Coding for Advance Care Planning (ACP) Services

Requirements, best practices, documentation requirements, and time thresholds for Advance Care Planning (ACP) services.

CAPC Palliative Care Referral Criteria

Checklist of triggers for referral to a specialty palliative care team.

Delivering Serious News to Patients and Caregivers

Learn best practices for having patient-centered conversations about a serious illness diagnosis. These discussions are the foundation of building a trusting clinician-patient relationship.

Communicating Prognosis to Patients and Caregivers

Learn how to effectively discuss prognosis with patients and their caregivers to ensure understanding and set the context for decision-making.

Leading Goals of Care Conversations

Learn best practices for building trust, eliciting patient values, and having patient-centered conversations about goals of care.

Conducting Effective Patient and Caregiver Meetings

Learn to effectively lead conversations that address a range of concerns and emotions to help patients and caregivers become aligned around the patient's goals.

Care Planning Conversations

Learn techniques to help patients and their caregivers plan for the future, both during the early stages of a serious illness and as a disease progresses.

Dyspnea

After completing this course, learners will have the tools they need to manage dyspnea, including the physical causes of shortness of breath and the emotional impact on the patient.

Course 1: Pain and its Impact on Our Patients

Learn to define and characterize pain, recognize the prevalence of pain, understand disparities in pain management based on race, ethnicity, and gender.

Course 2: How to Perform a Comprehensive Pain Assessment

Learn the components of a comprehensive pain assessment and its importance in safe and effective pain management.

Course 3: Matching Treatment to Pain Type

Gain an overview of pharmacologic and nonpharmacologic pain treatments, including risks and benefits, and learn how to match the analgesic to pain type.

Course 4: Prescribing an Opioid

Learn how to decide on an appropriate opioid, route of delivery, and dose, and understand how to prescribe for incident and breakthrough pain.

Course 5: Practice Prescribing an Opioid

Practice prescribing initial opioid doses for different pain types and characteristics. Learn to adjust dosing as needed to manage pain effectively.

Course 6: Creating a Pain Treatment Plan and Monitoring Effectiveness

Learn to develop a pain treatment plan with realistic goals and proper documentation, and implement universal precautions to help with the risk of opioid use disorder.

Course 8: Problems with Opioid Prescribing: Is it an Opioid Use Disorder?

Learn how to identify and diagnose opioid use disorder (OUD) and practice communicating with patients about OUD and pain management.

Safe and Age-Friendly Care for Older Adults

This course provides context and best practices for identifying older adults at risk for poor outcomes, including falls, delirium, and caregiving challenges.

Supporting the Caregivers of People with Serious Illness

This course offers tools and guidance for assessing and addressing the needs of caregivers of people with serious illness.

Coordinating Care and Planning Ahead

Guidance for all clinicians on improving communication and ensuring smooth transitions of care for patients living with serious illness.
