

Obstetrics and Gynecology

This learning pathway contains training and tools for OB/GYN professionals to provide expert symptom management for their patients with serious illness.

Course 4: Assessing Risk for Opioid Substance Use Disorder

Integrating routine risk assessment for substance use disorder when considering or using opioid therapy.

Course 6: Prescribing An Opioid

Safe and appropriate opioid prescribing for the opioid-naive patient with serious illness.

Prescribing Opioids: A Pocket Reference

Opioid pocket reference for providers including safe starting doses, equianalgesic chart, and standard dosing strengths.

Course 8: Monitoring for Opioid Efficacy, Side Effects, and Substance Use Disorder

Ongoing evaluation of opioid benefits, risks, and side effects for the patient with serious illness.

Course 10: Prescribing Practice and Opioid Conversions

Prescribing practice for long half-life opioids, converting from one opioid to another, and accounting for incomplete cross-tolerance.

Nausea and Vomiting in Patients with Serious Illness

Nausea and vomiting are common symptoms of serious illness, and can cause dangerous complications. Take this online course to learn practical skills to identify, manage, and reduce these symptoms.

Anxiety in Patients with Serious Illness

Take this online course to learn evidence-based strategies to identify and treat anxiety in patients with a serious illness.

Depression in Patients with Serious Illness

This online course teaches how to accurately identify and treat depression in patients living with a serious illness.

Reducing Risks for Older Adults

This course provides context and best practices for identifying older adults at risk for poor outcomes, including falls, delirium, and caregiving challenges.
