

Oncology

This Learning Pathway contains training and tools to help oncology professionals meet ASCO clinical practice guidelines for palliative care concurrent with oncology care. It includes continuing education courses in how to communicate with cancer patients about their goals of care and support difficult decision-making, address caregiver burden, and when to refer to specialty palliative care.

Collaborating with Palliative Care Teams

'I Don't Want Jenny To Think I'm Abandoning Her': Views On Overtreatment

A narrative article providing perspective on why some clinicians may recommend treatments (DE Meier).

Palliative Care Measures in Enhancing Oncology Model

Crosswalk of palliative care-relevant measures in the Enhancing Oncology Model that highlights how palliative care skills can mitigate risks for participating practices, as well as relevant CAPC resources.

Referral Criteria for Specialty Palliative Care

Checklist of triggers for referral to a specialty palliative care team.

Supporting the Family Caregiver: The Burden of Serious Illness

Assessing and supporting caregivers of people with serious illness.

Reducing Risks for Older Adults

This course provides context and best practices for identifying older adults at risk for poor outcomes, including falls, delirium, and caregiving challenges.

Best Practice Models

Palliative Care and the Oncology Care Model (OCM)

Recommended clinician training to improve on OCM measures.

Case Study: Moffitt Cancer Center's Approach to Identifying Patients with High Symptom Burden

Use of screening to risk-stratify patients for palliative care based on need. CAPC and the Accountable Care Learning Collaborative.

Overall Survival Results of a Trial Assessing Patient-Reported Outcomes for Symptom Monitoring During Routine Cancer Treatment

Integration of patient-reported outcomes (PROs) into the routine care of patients with metastatic cancer is associated with increased survival compared with usual care. Basch, et. al. JAMA 2017.

Impact of Interdisciplinary Outpatient Specialty Palliative Care on Survival and Quality of Life in Adults With Advanced Cancer: A Meta-Analysis of Randomized Controlled Trials

Patients with advanced cancer randomized to receive outpatient specialty palliative care lived longer and had better quality of life. Hoerger, et. al. Annals of Behavioral Medicine, September 2018.

Communication Skills

Discussing Serious News

Learn best practices for having patient-centered conversations about a serious illness diagnosis.

Discussing Prognosis With Patients and Caregivers

Learn how to effectively discuss prognosis with patients and their caregivers.

Clarifying Patient Goals of Care

Learn best practices for building trust, eliciting patient values, and having patient-centered conversations about goals of care.

Leading a Patient and Caregiver Meeting

Learn to effectively lead meetings that help patients and caregivers become aligned around the patient's goals.

Care Planning

Learn techniques to help patients and their caregivers plan for the future, both during the early stages of a serious illness and as a disease progresses.

Billing and Coding for Advance Care Planning (ACP) Services

Requirements, best practices, documentation requirements, and time thresholds for Advance Care Planning (ACP) services.

Pain and Symptom Management

Anxiety

After completing this course, learners will be equipped with evidence-based strategies to identify and treat anxiety in patients living with a serious illness.

Constipation

Constipation occurs in at least 70% of patients living with a serious illness and often goes unrecognized. After completing this course, learners will have the tools to successfully identify and manage the impact of constipation.

Depression

After completing this course, learners will have the tools to accurately identify and treat depression in patients living with a serious illness.

Dyspnea

After completing this course, learners will have the tools they need to manage dyspnea, including the physical causes of shortness of breath and the emotional impact on the patient.

Nausea/Vomiting

Nausea and vomiting are common symptoms of serious illness and can cause dangerous complications. After completing this course, learners will be equipped with practical skills to identify, manage, and reduce these symptoms.

CAPC Palliative Care Referral Criteria

Checklist of triggers for referral to a specialty palliative care team.
